

KAMBIZ HOSSEINI

Dublin, Ireland | +(353) 87-434-7453 | hosseini.kambiz@gmail.com | <https://www.linkedin.com/in/kambiz-h>

Accomplished Technical Lead and Senior Software Engineer with over 15 years of experience leading Java-based enterprise systems and Kubernetes platform initiatives. Adept at architecting and delivering high-performance, fault-tolerant, and secure solutions across banking, payment domains and telecommunication systems. Experienced in Kubernetes Operators, Spring Boot microservices, and container orchestration. Committed to driving innovation through cloud-native design, automation, and engineering excellence.

Key Skills

Languages & Scripting: Java (Core, 8+), GoLang, Groovy, Bash Scripting

Frameworks & Libraries:

Backend: Spring (Spring Boot, Spring MVC, Spring Security), Grails, Struts, JPA (Specification), Hibernate (ORM)

Integration & Messaging: Apache Camel

Concurrency & Distributed Systems: Akka

Streaming & Event Processing: Apache Kafka

Cloud & DevOps: Kubernetes, Docker, AWS, Terraform, Ansible

Testing & Quality Assurance: JUnit, Mockito, JMeter

Databases & Persistence: Oracle, DB2, Informix

Application Servers & Middleware: IBM WebSphere, JBoss, Tomcat, GlassFish

Operating Systems: Linux, Solaris, AIX

Software Architecture & Design: Domain-Driven Design (DDD), Microservices

Security & Compliance: CISSP Training, Penetration Testing, Secure Coding Practices

Project & Team Management: Agile, Scrum, JIRA, Confluence

Version Control & Code Collaboration: Git, Gerrit, Mercurial

WORK EXPERIENCE

Senior Software Engineer Mastercard

JUNE 2025 - PRESENT
IRELAND

- **Platform Automation:** Designing orchestration patterns for APIGW onboarding, AAP, Terraform Enterprise, event-driven automation, approval workflows, and long-running process management to support secure and auditable platform operations.
- **Control Plane / Operators:** Contributing to Mastercard's Kubernetes-native Control Plane, building Operators using Spring Boot, the Java Kubernetes Client, and Custom Resource Definitions (CRDs) to automate application provisioning, drift correction, and compliance enforcement across multi-cluster environments.

Senior Software Engineer Ericsson Solutions in GlobalLogic

MARCH 2022 - JUNE 2025
IRELAND

- Developed cloud-native solutions for Ericsson's cENM products, leading to an improvement in scalability.
- Migrated legacy applications to Kubernetes, cutting deployment times..
- Implemented robust testing strategies with 90% code coverage, reducing post-deployment defects.
- Acted as Security Master, ensuring industry-standard security practices and minimizing vulnerabilities. Providing Code review focusing on security and performance .
- Delivered 24/7 production support for CBRS solution across USA and Canada, maintaining 99.9% uptime.
- Mentored junior engineers, improving team efficiency.

Technical Lead Software Engineer Banking and Payment Solutions in iMocha Sdn. Bhd.

APRIL 2013 - FEBRUARY 2022
MALAYSIA

- Led development for banking systems, including FPX, ePayroll, and Direct Debit, improving product functionality.
- Spearheaded the migration and optimization of high-load banking applications, boosting system performance.
- Provided high-priority production support for critical banking systems, ensuring consistent uptime and issue resolution.
- Optimized and secured various financial systems for CIMB Bank, Bank Rakyat, and Bank Islam.
- Managed product customizations, meeting stringent deadlines and client expectations.
- Conducted code reviews and security audits, reducing vulnerabilities.
- Ensured compliance with disaster recovery principles while adhering to the bank's SLA to effectively address disasters.

Software Developer South School and Freelancing

APRIL 2010 - FEBRUARY 2012
AUSTRALIA

- Developed and delivered high-quality code across multiple Java-based projects.
- Collaborated with international teams to meet tight deadlines and client specifications.

Technical Lead & Head of Technical Support TMICTO

APRIL 2008 - FEBRUARY 2010
IRAN

- Centralized 30+ Solaris servers through virtualization, reducing maintenance costs.
- Led support for over 150 Solaris servers and databases, enhancing system performance and uptime.
- Established a new Helpdesk department and achieved reducing response times.

EDUCATION

- Master of Computer Science, Information Security / UTM
- Master of Computer Science / Swinburne University
- Bachelor of Computer Science / Tehran Azad University
