

KAMBIZ HOSSEINI

Dublin, Ireland | +353 87 434 7453 | hosseini.kambiz@gmail.com | linkedin.com/in/kambiz-h

PROFESSIONAL SUMMARY

Technical Lead and Senior Software Engineer with 15+ years building high-throughput, low-latency Java/JEE systems for banking, payments, and telecom. Deep experience designing multi-tier, message-oriented architectures processing high transaction volumes under strict SLAs. Track record leading development teams, owning full SDLC from requirements through production support, and enforcing PCI and secure-coding standards. Spring Boot, Oracle/PL-SQL, distributed systems, Kubernetes.

KEY SKILLS

Languages: Java (Core, 8+), Groovy, Go, Bash, PL/SQL

Frameworks: Spring Boot, Spring MVC, Spring Security, Grails, Struts, Hibernate/JPA, Apache Camel, Akka

Messaging & Streaming: JMS, Apache Kafka, message-oriented architectures

Data: Oracle, DB2, Informix, advanced SQL tuning, distributed caching

Middleware: IBM WebSphere, JBoss, Tomcat, GlassFish

Cloud & DevOps: Kubernetes, Docker, OpenShift, Jenkins, Terraform, Ansible, AWS

Testing & Quality: JUnit, Mockito, JMeter, performance benchmarking, TDD

Architecture: Domain-Driven Design, microservices, multi-tier enterprise systems, UML

Security & Compliance: PCI DSS, secure code review, CVE risk assessment, CISSP training

Process: Agile/Scrum, Jira, Confluence, Git, Gerrit

WORK EXPERIENCE

Senior Software Engineer
Mastercard

Jun 2025 – Present
Dublin, Ireland

- Build Kubernetes Operators in Spring Boot using the Java Kubernetes Client and CRDs, automating application provisioning, drift correction, and compliance enforcement across multi-cluster environments.
- Design event-driven orchestration for API Gateway onboarding across Terraform Enterprise and Ansible Automation Platform, including approval gates and long-running process management for auditable platform operations.
- Partner with architects, platform teams, and product owners across Dublin and other Mastercard locations to align designs with internal standards.

Security Master / Senior Software Engineer
GlobalLogic (Ericsson Solutions)

Mar 2022 – Jun 2025
Ireland

- Led development of Ericsson's CBRS Engine, a high-throughput, highly concurrent distributed system supporting mission-critical network operations.
- Led design, development, and maintenance of cloud-native Java applications for the cENM product suite, drove migration of legacy applications to Kubernetes, improving scalability and deployment automation.
- Served as team Security Champion: drove secure development practices, led security-focused code reviews, and performed risk-based CVE assessments.
- Established unit, integration, and Docker-based testing practices reaching ~90% coverage, significantly reducing post-deployment defects.
- Led 24/7 production support and incident response across US and Canada deployments, maintaining 99.9% availability.
- Mentored junior and senior engineers through technical coaching, code reviews, and knowledge sharing.

Technical Lead / Solution Architect — Banking & Payment Solutions
iMocha Sdn. Bhd.

Apr 2013 – Feb 2022
Malaysia

- Led design and delivery of enterprise banking and payment platforms for CIMB Bank, Bank Rakyat, Bank Islam, and AmBank including FPX, ePayroll, Direct Debit, and Internet Banking.
- Architected high-volume payment processing systems handling real-time transaction flows with strict latency and availability requirements.

- Led a team of software engineers, providing technical leadership, architecture guidance, code review, and mentoring.
- Owned full SDLC artifacts: requirements documents, use cases, solution designs, test strategy, deployment and back-out plans, and impact assessments for regulatory enhancements.
- Developed and optimized Java/J2EE applications on IBM WebSphere; tuned high-load systems and Oracle/DB2 queries for throughput and reliability.
- Investigated and resolved Severity 1 production incidents, performing root cause analysis and implementing preventive measures.
- Conducted secure code reviews and application security assessments, improving compliance with banking security standards.
- Ensured compliance with disaster recovery policies, operational SLAs, and banking regulatory requirements.

Software Developer

Apr 2010 – Feb 2012

South School & Freelance,

Australia

- Developed and delivered Java-based projects with distributed international teams to tight deadlines.

Technical Lead & Head of Technical Support

Apr 2005 – Feb 2010

TMICTO,

Iran

- Led a team of 22 administrators supporting 180+ servers and 40+ enterprise systems for the Municipality of Tehran.
- Led migration and centralization of 30+ Solaris servers (10,000+ users) using Solaris Zones/ZFS virtualization.
- Managing and establishing a new Helpdesk function.

EDUCATION

Master of Computer Science (Information Security) — Universiti Teknologi Malaysia (UTM)

Master of Computer Science — Swinburne University of Technology

Bachelor of Computer Science — Tehran Azad University
